THE ND DOS NETWORK MENU SYSTEM

The 3+MENU system is used by both the network Users and the Administrator to perform the basic network tasks. There are two types of menus; User and Administrator.

This reference card describes the menu system available to the Network User. Refer to the Administrator Guide if you need the Administrator Menu.

The **Network User Main Menu**. The User Menu is designed for network users, and contains the most commonly used network functions.

Directories and Files Available files and directories already linked to the PC
Shared Resources Additional directories and printers available on the network
Printer Connections Printers connected to the PC through the network
Log Out Close all links and Exit from 3+Menus
Change Password Allows user to change password

The **Network Administrator Main Menu**. This main menu for the network administrator contains options for all the network functions provided by the server.

In addition to the options found in the User Main Menu, the administrator has two additional options; *Network Administration* and *Tape Backup*.

Network Administration Contains all network supervision tasks

Tape Backup Functions for taking backup on a streamer tape drive

A complete listing of all options (and suboptions) in the Network Administrator Main Menu is included in Chapter 4 of the Administrator Guide.

Starting 3+MENUS

To start 3+MENUS a user must be logged-in on the network and linked to the default *Apps* and *Home Directory* sharenames.

To start 3+MENUS from the DOS level, do the following:

```
menus <return>
```

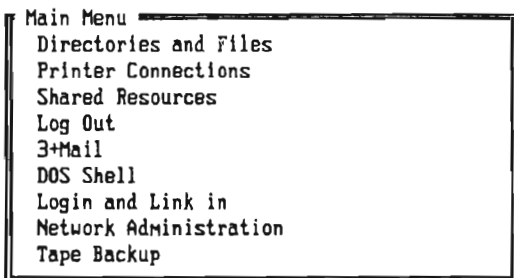

Use the up and down arrows to navigate to the various menu options. Type <return> or ENTER to choose an option. Type ESCAPE to return to the previous menu.

Closing 3+MENUS

Choose the option QUIT from the menu bar, answer Y when prompted to verify choice and you will be returned to the DOS prompt. If no menu bar is visible, type the forward backslash character (/). A menu bar will appear over the main menu.

For more information about 3+MENUS, see the manual *ND DOS Server - 3+Menus Reference Guide - 3+Share User Guide ND 860379*.

```
Open Modify Close Window Quit
Open the selected item
```

Main Menu with Menu Bar. (Example. Your own menu may look different.)

LOGIN, LOGOUT, START & STOP 3+MENUS

Login routine:

Depending on how your computer is set up, you will either go directly to the network login routine, or you can log in from DOS by typing **NDSTART**<return>.

Name? *User Name* or *Alias*<Return>

Password? *Password*<Return>

Normally, you will go straight into 3+Menus after login. To start 3+Menus from DOS, type **MENUS**<return>.

To Quit 3+Menus and go to DOS, choose **Quit** from the command menu at the top of the screen.

If no command menu is visible, press </>.

To Log out from the network choose **Log out** from the Main Menu.

MAIN MENU

To select an item from the menu use the cursor control keys to place the highlight on the desired item. To open the item, press <return> or choose **Open** from the command menu.

Directories and Files

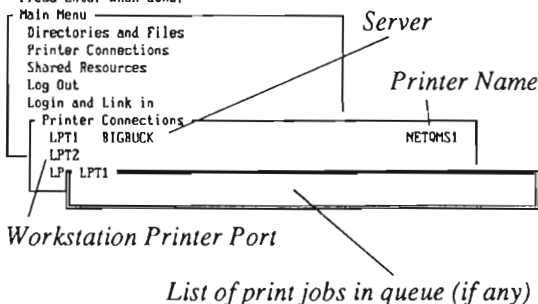

This menu lists available directories and files on the network and where they are located, as well as sharenames and server names. From this menu files can be edited, shared, moved, and transferred, and the file contents viewed.

Printer Connections

Use this menu to see which printers are linked, to see the print queue, modify print settings, and delete or give priority to print jobs.

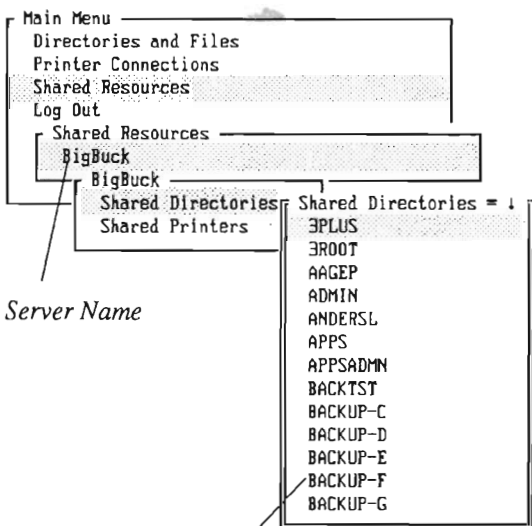

To link a printer, see *Shared Resources: Shared Printers*. If no printers are linked the printout is directed to your local printer, if you have one.

Use the cursor keys or Ctrl-cursor keys to move the window.
Press Enter when done.

Shared Resources

From this menu you can see shared resources, share/unshare files and directories, link directories and printers.

Server Name

Shared Dierctories on Server

FUNCTION KEYS:

F1 - Help

F2 - Not Used

F3 - User Status

F4 - Expand or Contract an active window

F5 - Go to DOS temporarily, with menus still resident

Shift + F5 - Go to DOS temporarily, menus non-resident

F6 - Mark highlighted item

F7 - Make previous Window active

F8 - Make next window active

F9 - Not Used

F10- Not Used

<Return> - Open active (highlighted) menu item or choose a command

ESC - Close a window, remove command line, or cancel command

/ - Make command line visible

SELECTING WINDOW ITEMS

↑ - The item above the current selection

↓ - The item below the current selection

<Home> - The first item in the list

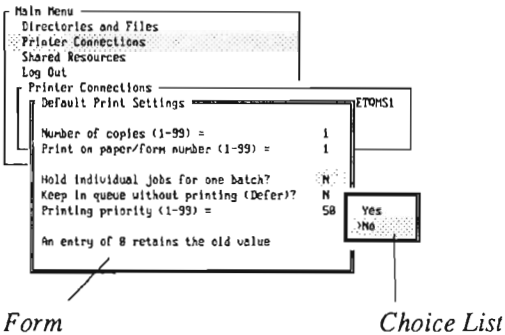

End - The last item in the list

PgUp - The first item one window up

PgDn - The last item one window up

FORMS

Some operations require you to set parameters. When this is necessary a "form" is displayed, and you are required to either type in the necessary information in the appropriate field or choose an item from a Choice List. The relevant choice list is displayed automatically when you move the cursor to the field it concerns.

MOVING AROUND IN A FORM:

- ↵ - The next field
- ↑ - the closest field above this one
- ↓ - The next field down
- Tab - The next field
- Shift+Tab - The previous field
- CTRL+<Home >- The first field
- CTRL+End - The last field
- <Home> - Beginning of field
- End - End of field.

Entering Information in a Form

To enter information in a form, type it into the field and press ↵ to move on. Tab or Shift+Tab will also accept the data and move the cursor.

To enter information from a choice list, press ↵ to get the default value, or use ↑/↓ to choose an alternative, then press ↵.

KEYS TO EDIT FORMS:

← - Move cursor one character left

→ - Move cursor one character right

Ins - Turn Insert mode on/off

Del - Delete the character at the cursor position

Backspace - Delete character left of cursor position

F5 - Delete the contents of the current field

<Home> - Move cursor to beginning of field

End - Move cursor to end of field

CTRL+↵ - Put away the form and execute the command

- Enter the information in the field and move on.
