Description of product

Enhance security against disk failures by automatically duplicating data stored on selected disk(s). Allow online backup of databases to be taken.

Reason for new version

In the L-version of SINTRAN III, the disk mirroring code are merged with the SINTRAN III code. This means that SINTRAN patching is no longer a part of the installation procedure. Further, all messages are routed through the new SINTRAN III error handling, the ERS watchdog. The FTX error logger is thus no longer a prerequisite.

Product Information

Product name

Disk Mirroring

210855E

1 Prerequisites

The following things are required in order to use this product:

1.1 Hardware prerequisites

The following hardware must be present for this product to be used:

CPU type (any of the following):

- 100 CX
- 110 CX
- 120 CX

Floating format: All

Other hardware:

NONE

1.2 Software prerequisites

The following software must be installed on the system for this product to be used:

Operating system:

	Name	Version/Revision
	SINTRAN III	Σ L
<u>0t</u>]	her software:	
	Product_name	Product number
or	FTX Error Logger version A03 ER-S3WD EDAT-file version B11	211128A
	UE-Errors version CO2 or later	250178C

Disk Mirroring

Product number

210855E

1.3 Other prerequisites

The following are necessary for this product to be used:

Minimum Permanent Mass Storago Üser area		Number of files
FTX	140	3
Number of segments (ND-100) Number of RT descriptions	Minimum 2 2	Maximum 2 2
Space required on segment file	es: 68 page	es
Requirements regarding internation	al devices: NON	١E
Requirements regarding batch	processors: NON	١E

2 Dependencies

In addition to the hardware and software prerequisites listed above, the following dependencies exist between this and other products. The hardware and software listed here may, for example, be necessary to use the product's full functionality.

2.1 Hardware dependencies

NONE

2.2 Software dependencies

There are dependency relationships between this product and the following software:

Product name

SINTRAN III

Nature of dependency

SINTRAN III must be prepared for Disk Mirroring and generated with the number of clusters wanted.

4 Installation procedure

4.1 Automatic installation

- Log in as user area SYSTEM.
- Insert the diskette containing Disk Mirroring in a floppy disk drive and enter the directory by typing the command (use the actual controller and unit numbers on your system):

@ENTER-DIRECTORY 210855E,FLOPPY-DISC-<controller>,<unit>⊷

• Start the installation program by typing

@(210855)IN-DIMIR

- Follow the directions given by the installation program.
- Remember to remove the diskette when finished.
- 4.2 Non-automatic installation

NONE

5 Modifications

- 5.1 New functions/commands NONE
- 5.2 Changed functions/commands NONE
- 5.3 Removed functions/commands NONE
- 5.4 Other modifications

NONE

6 Errors corrected

NONE

7 Errors known but not corrected

Some rare error messages from the REVIVE process are written directly to the error device and not logged through SINTRAN.
